1. Introduction

Project ReHelp is a social network (with both web and mobile application) that encourage the creation of true relationships between users via mutual helps and cooperation in social actions. The idea came from the agricultural community where especially in older times they used to helps each other, borrowing instruments, donating foods or helping with the harvest. Other modern examples of similar phenomena are the social streets, the first one was born in Bologna, but they have become widespread all over the World. Our app aims to create a

genuine environment for the users, giving them the instruments to connect with other people of the community: the one who request the help reward the other with a token called likehelp that works as a coin that you can spend to receive helps from someone else.

2. Registration & Login

Users already registered on the site, can directly log in by clicking on the button Accedi, otherwise, clicking on Registrati, can create a new account or login via social networks.

2.1. Registration

The user can sign into the application through the registration page. Was also inserted Google ReCaptcha to avoid the registration of bots.

3. Home page

Once logged in, the user can visit his personal profile or choose the type of help that best suits his needs.

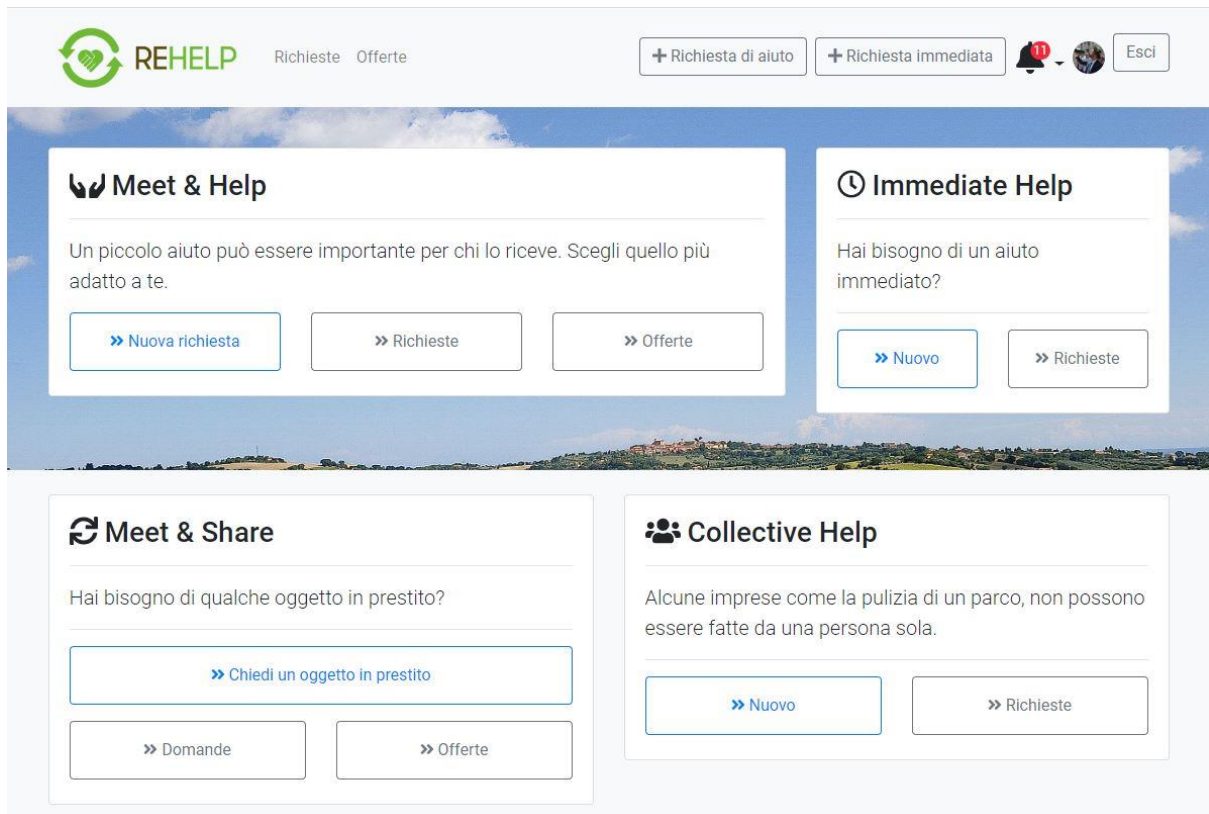

Figure 3.1 - Home page

3.1. Notifications

The user can view notifications related to their requests or offers of help by clicking on the little bell that also show the number of the notifications. Notifications can be based on a response on a help request that the user has created, for an acceptance of a offer that he gives to another user, based on a likehelps exchanged, etc...

Figure 3.2 - Notification

4. Profile

In the profile page, the user can modify his personal data and insert his location or he can modify his password. He can also navigate the tabs “Aiuti offerti” and “Aiuti richiesti” for check the history of his activity. On the “Offerta” tab, the user can check the categories where he feels he can offer help.

5. Meet & Help

In the case of meet & help, the user can choose whether to give or receive help.

5.1. Meet & Help - Create help request

The user who wants to publish a request for help must enter certain fields, in particular must choose between the categories pre-loaded in the system, which suits his request; can load an image in order to describe visually what it needs and can enter the reference area or by writing the address in the appropriate section or dragging the marker inside the map that, by default, takes the current position of the user.

5.2. Meet & Help - Find someone to help

If you want to find someone to help, you will find a list of help with the author and the date of creation. Once you have chosen the help to give, you can click on Details to start the activity. If we want to help a user, we must click “Aiuta” and, optionally, enter a message.

The screenshot shows the REHELP website interface. At the top, there's a navigation bar with the REHELP logo, links for 'Richieste' and 'Offerte', and buttons for '+ Richiesta di aiuto', '+ Richiesta immediata', a notification bell, a user profile icon, and an 'Esci' button. Below the navigation bar, the main heading is 'Incontra e aiuta (Meet and Help)' with a '+ Nuova richiesta di aiuto' button. A table lists help requests with columns: 'Richiesta di aiuto', 'Posizione', 'Creata', and 'Autore'. The first entry shows a photo of a chair, the category 'Aiuto piccole riparazioni carpenteria', the title 'aiuto per riparazione sedia', the location 'Strada Provinciale 113, 124, 62020 Penna San Giovanni MC, Italia', the date '19/05/2020', and the author 'Danilo Paoletti'. There are 'Visualizza' and 'Aiuta' buttons for this request. At the bottom, there's a footer with links like 'Chi siamo', 'Come funziona', 'Contattaci', 'Domande frequenti', 'Offerte di lavoro', 'Stampa', 'Termini e Condizioni', and social media icons for Facebook, Twitter, YouTube, and Instagram.

Figure 5.2 - Meet & Help - list

The screenshot shows the REHELP website interface for responding to a help request. At the top, there's a navigation bar with the REHELP logo, links for 'Richieste' and 'Offerte', and buttons for '+ Richiesta di aiuto', '+ Richiesta immediata', a notification bell, a user profile icon, and an 'Esci' button. Below the navigation bar, the main heading is 'Offri il tuo aiuto' with a '< Richiesta' button. A form is displayed with fields for 'Categoria' (Aiuto piccole riparazioni carpenteria), 'Richiesta' (aiuto per riparazione sedia), 'Descrizione' (mi serve un aiuto per riparare una sedia), 'Creatore' (Danilo Paoletti), 'Data creazione' (19/05/2020), and 'Messaggio (opzionale)' (ti aiuto io). There is a '+ Rispondi' button at the bottom of the form.

Messaggio (opzionale)	ti aiuto io

Figure 5.3 - Meet & Help - response

Once the offer of help has been sent, it will be necessary to wait for the user who has published it to accept the offer.

The user who requested help, on his profile, will find all the requests made. To see the status of the help, we find icons next to the “Dettagli” button.

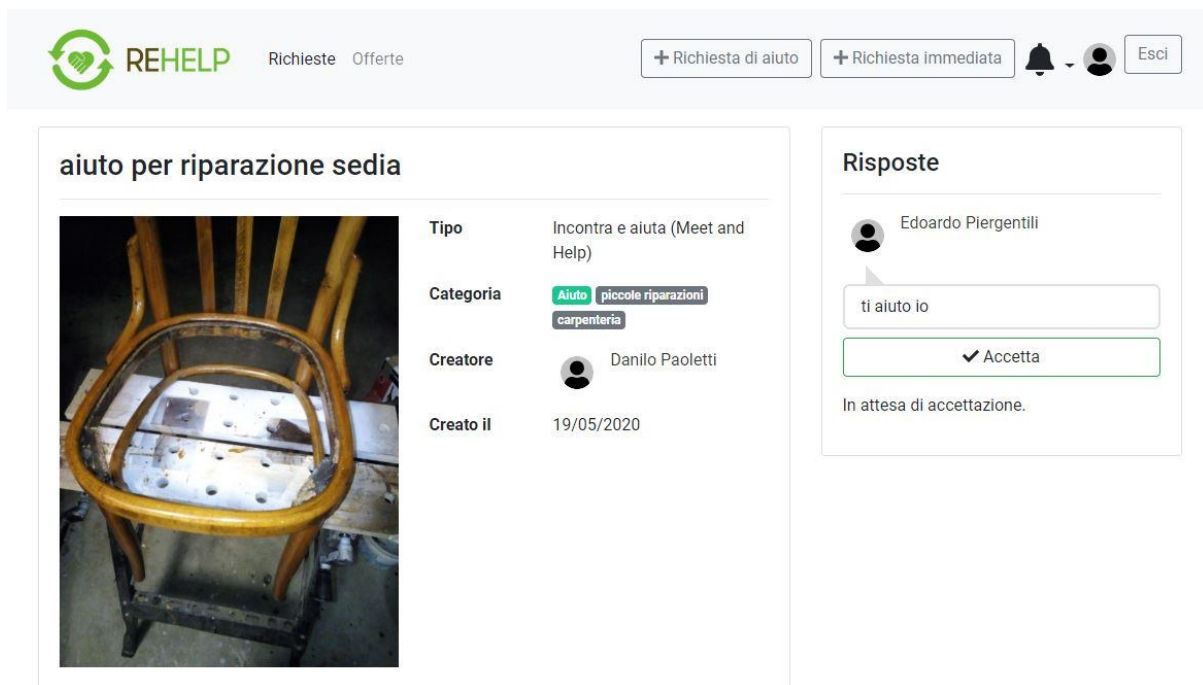

Figure 5.4 - Meet & Help - Response - detail

Under “Risposte”, the user will find all the answers to his request and can only accept one. Once accepted, a chat will be activated between the creator and the responder where they can exchange messages in real time. Under Answers the user will find all the answers to his request and can only accept one. Once accepted, a chat will be activated between the creator and the responder where they can exchange messages in real time.

When the job will be finished, the help creator will have to click on the “Il lavoro è finito”. and a modal will be opened for the input of feedback, necessary to carry out the likehelps exchange.

The user who answered to the help request, will find a review received:

So, in order for the likehelp exchange to take place and the work to be completed, you will in turn have to review the user who created the help in the same manner as above.

Lascia un feedback e completa la richiesta

5.3. Meet & Help - Ask help to someone

In this page, the user can find all the registered users and a map that geolocates them if they have entered their location in the profile. He can also filter users by distance and categories. So the user can click on the marker and will open a popup with user avatar, firstname and lastname. If registered users have entered the categories where they feel they can offer help, the current user can click to “Chiedi aiuto” button to ask help specifically on the categories chosen by the user to whom he is asking for.

8. Collective Help

Collective help is used to ask for help to more people, for example for cleaning squares, etc. So the user who ask collective help can accept more than one response and, the likehelp exchange is a little bit different than the other type of helps:

- The user who create the request loose 1 likehelp after the release of feedback, that is one for all the accepted users.
- All the accepted users gains 1 likehelp for person, given by the platform. They also can optionally release a feedback for the user who asked collective help.
